SD SWCS Mission - To foster the science and art of natural resource conservation.

Our work targets conservation of soil, water, and related natural resources on working land—the land used to produce food, fiber, and other services that improve the quality of life people experience in rural and urban communities. We work to discover, develop, implement, and constantly improve ways to use land that sustains its productive capacity and enhances the environment at the same time.

SD SRM Mission – To promote the professional development and continuing education of members and the public and the stewardship of rangeland resources.
